There had been an epidemic of Scarlatina during the last quarter of 1924, which continued through January, 1925, 17 cases; Feb., 11 cases; March, 5 cases; April, 2 cases; May, 2 cases; June, 1 case; July, 3 cases; August, 4 cases; and in November, 1 case.

All cases (except one), forty-five in all, were removed promptly to the Isolation Hospital, with disinfection of the homes and during holidays thorough disinfection of the Schools.

There was one case of Small Pox notified at the end of the year, at Mangham Quarry. In my opinion this was a "contact" from Rawmarsh, where Small Pox was then assuming epidemic proportions. The case was promptly isolated at Hooper, and every effort made to prevent the disease spreading, by vaccination and supervision; and I advised the Council to have Chicken Pox added to the list of Notifiable diseases.

Tuberculosis.

There were two deaths from Tuberculosis during the year, Respiratory, 1 ; Non-Respiratory, 1.

There were, at the end of the year, the following cases on the Register in the District :—

Males—Pulmonary, 21 ; Non-Pulmonary, 13			
Females	„	18 ;	„ 8
		—	—
		39	21—Total 60

New cases notified in 1925—Pulmonary, 13 ; Non-Pulmonary, 13.

The causes of Death are shewn on the accompanying Table :—

SPECIAL REPORTS AND INVESTIGATIONS ON ANY SUBJECTS.

SUPPLEMENTARY REMARKS as to Sanitary requirements of District, suggestions of M.O.H., and extended notes on any of the foregoing entries.

The chief matters now requiring attention are:—

1. *Cowsheds*

2. *Metheringham sewage*

3. *Constant waterling in street of Big & Parvity Reservoir*

4. *Houseing (old houses; inspection & repairing)*

5. *Improving the condition of backyards*

6. *Appointment of 1 primary surgeon in inspecting & cross*

Cowsheds and Dairies.

I have spent three half days with County Council Officers and Estate Agent, also the Medical Officer, making about 15 visits.

I find that the places are in the same condition now as when I previously reported.

Scavenging.

This is done by Contractor, and has been fairly well attended to.

The excreta is removed to tips on the land, for farmers' use, and the dry ashes to Clough Wood.

The annual cost of Scavenging is £465 9s. 10d.

Sewage Works.

The new Sewage Works were opened on 18th August, 1925.

The old works had been in operation for many years—upwards of 25—and besides being overworked were so situated that they could not deal at all with the Sewage from the Mangham and Holm Flat part of the district. The new works are at a lower level, and with the help of an efficient pumping plant, deals with the sewage from the lower part of the district, thus dispensing with the old and admittedly unsatisfactory treatment at Mangham Road.

It is hoped that now the conversion of privies into water-closets will be more rapidly proceeded with, and in the near future Greasbrough will be no longer spoken of as “a midden village.”

There are no new privies being constructed now. During 1925 there were 41 new water closets constructed for new houses; 6 privies converted into water closets, and 1 water closet constructed for old property.

The Nether Haugh part of the district concerning which I have for years urged that something ought to be done in the way of Sewage disposal, is still unprovided for.

The Water Supply from Rotherham County Borough remains quite satisfactory.

Milk, Cowsheds and Dairies.

Greasbrough produces a considerable quantity of Milk.

There are, on the Register, 14 Cowkeepers, producing and selling milk, and 3 milk retailers.

The conditions under which this milk is produced are therefore worthy of careful and painstaking inspection. Two most important considerations are the ventilation and lighting of the Cowsheds. These matters I went into with the assistance of the Sanitary Inspector about a year ago. I found the ventilation and the lighting of most of the Cowsheds very defective indeed.

The buildings are mostly structurally faulty according to modern ideas.

The Sanitary Inspector prepared a report on each building inspected, and it was presented to the Council. The owners and tenants had the requirements of the Council plainly stated, and so far as I know there has been no response.

I consider that now this is the most important matter requiring the attention of the Council.

I also consider that the Council ought to appoint a Veterinary Surgeon to inspect the Milk Cows at intervals.

Remembering how largely milk enters into the diet of young people, and its liability to contamination with Tubercle, I am of the opinion that the Council ought to aim at making the milk sent out from Greasbrough clean and free from taint. Dingy cowsheds, in which the air is stagnant, with accumulations of manure near the doors, and festooned with cobwebs, are not the kind of places from which we can reasonably expect clean and untainted milk.

Nursing Arrangements, Hospitals, etc.

The old arrangement under which the Nurses from the "Nurses' Home" in Parkgate visited the Greasbrough district, was terminated at the end of 1924, and similar work is now done by County Council Nurses from the Clinic and Child Welfare Centre in Parkgate.

The Centre there is also visited by mothers and children from Greasbrough, and is fairly well taken advantage of.

Isolation Hospitals.

For Infectious Diseases—The Joint Hospital at Wath Wood, with two Ambulances.

A small Hospital is reserved at Hoover for Small Pox.

For Tuberculosis the County Council provide a Dispensary at Rotherham, through which suitable cases are sent to the Sanatoria, at the disposal of the West Riding County Council.

Factories and Workshops.

There are in the District the following:—

- (1) A Boat Repairing Yard.
- (2) Basic Slag Works.
- (3) Messrs. Oxley and Co's Steel and File Works.
- (4) A Wagon Repairing Shop (Parkgate Iron and Steel Co., Ltd).

(5) A Corn Mill.

(6) The South Yorkshire Coke and Chemical By-Product Works.

2 Dressmakers,

3 Joiners' Shops.

1 Blacksmith's Shop.

3 Boot and Shoe Repairers,

The Inspector has found nothing to take objection to, and there has been no action taken.

There are no outworkers.

Mortuary.

I am pleased to state that a Mortuary has been built behind the New Council Buildings. It was ready for use on 30th December, 1925.

Housing during 1925.

During the year Greasbrough acquired 42 new houses—

Under Council Scheme	30
By Private Builders	12

There were 3 old houses demolished, and regarding 2, closing orders were issued, the houses having been certified by the M.O.H. as being in their present state totally unfit for habitation.

Total number of houses	797
Number of Working Class Houses	757

I am,

Your obedient Servant,

EDWIN B. JAGO,

Medical Officer of Health.
